Common Name	Botanical Name	Description
Fruit Trees and Shrubs		
Malus - Apples		
Our apples are 2-year on bud, branched and grown on hardy seedling rootstock		
Battleford Apple	Malus 'Battleford'	A large early season striped red over light yellow apple. High eating quality if picked at proper maturity. Tree is very cold hardy.
Fall Red Apple	Malus 'Fall Red'	A good storing, large-sized apple that ripens in the later part of September.
Gemini Apple	Malus x 'Jefcoutts'	An outstanding new variety derived from a 'Norland' x 'Haralson' seedling cross selected by Art Coutts of Unity, Saskatchewan and introduced by Jeffries Nurseries. Gemini produces large sized fruit that is crisp, juicy and of medium sweetness. The fruit ripens in late August and stores well into the new year. The tree has excellent cold hardiness and resistance to disease.
Goodland Apple	Malus 'Goodland'	A later season high-quality apple. Green with a red blush and good keeping abilities.
Harcourt Apple	Malus 'Harcourt'	A large red-blushed, high quality apple, which isn't featured enough in the market.
Hardi-Mac Apple	Malus 'Hardi-Mac'	Medium sized bright red fruit with white crispy, juicy, aromatic flesh and a distinctive flavour. Hardy apple for eating fresh or baking. Ripens mid-September. Original tree in Calgary.
Honeycrisp Apple	Malus 'Honeycrisp'	A Minnesota developed apple that has very high eating and storing value. The hardiness is much like a MacIntosh, ripening late in the season.
Kerr Apple	Malus 'Kerr'	An extremely hardy, slow growing tree with bright red crabs of the highest quality. There are limited quantities available in CVI.
Norkent Apple	Malus 'Norkent'	A newer introduction that is very hardy. Good eating quality and good for storage.
Norland Apple	Malus 'Norland'	The favourite of many. A vigorous growing variety with a large, red striped apple.
Odyssey® Apple	Malus x "Jefsey"	Introduced by Jeffries Nurseries in 2008. Produces medium-large sized fruit in late August that store well into the New Year. The fruit is crisp and of excellent sweetness. Many have described the flavour as comparable to the 'Royal Gala' Apple that has become a consumer choice across North America.
Parkland Apple	Malus 'Parkland'	A medium-sized apple, which is yellow/green with some red stripes. The tree itself stays relatively small.

Common Name	Botanical Name	Description
Fruit Trees and Shrubs		
Malus - Apples		
Red Sparkle Apple	Malus 'Red Sparkle'	A new Morden Research Station introduction that matures in early September. Excellent taste, medium size, and good for storage. A McIntosh/Trail cross.
Rescue Apple	Malus 'Rescue'	The favourite crabapple. It is very hardy, bears heavily and has good-sized red fruit.
September Ruby Apple	Malus 'September Ruby'	A large-sized apple, good for eating and storage qualities.
Strathcona Gold Apple	Malus 'Strathcona Gold'	An introduction from Millcreek Nurseries, Edmonton, Alberta. A yellow coloured thin skinned, medium-sized very hardy apple. Good eating quality.
Zestar!® Apple	Malus domestica 'Zestar'	The most outstanding feature of a Zestar!® Apple is its sprightly sweet-tart taste with a hint of brown sugar. Zestar!® is juicy with a light, crisp texture and the fruit ripen in late August to early September. Zestar!® has the hardiness to perform in northern apple-growing regions.
Malus - Combination Apples		
Our apples are 2-year on bud, branched and grown on hardy seedling rootstock		
Combination Apple	Malus - Combination Apples	Multiple good eating quality varieties budded on hardy rootstock.
Malus - Dwarf Apples		
We have grown the following varieties on Budagovski 9 rootstock to give the variety a size that will be limited to approximately 25% of its regular size.		
Battleford Dwarf Apple	Malus 'Battleford'	A large early season striped red over light yellow. High eating quality if picked at proper maturity.
Goodland Dwarf Apple	Malus 'Goodland'	A later season high quality apple. Green with a red blush and good keeping abilities.
Harcourt Dwarf Apple	Malus 'Harcourt'	A large red blushed, high quality apple which isn't featured enough in the market.
Honeycrisp Dwarf Apple	Malus 'Honeycrisp'	A Minnesota developed apple that has very high eating and storing value. The hardiness is much like a MacIntosh, ripening late in the season.
Norkent Dwarf Apple	Malus 'Norkent'	Very hardy with good eating quality and good for storage.
Norland Dwarf Apple	Malus 'Norland'	The favourite of many. A vigorous growing variety with a large, red striped apple.
Parkland Dwarf Apple	Malus 'Parkland'	A medium-sized apple which is yellow/green with some red stripes. The tree itself stays relatively small.

Common Name	Botanical Name	Description
Fruit Trees and Shrubs		
Malus - Dwarf Apples		
September Ruby Dwarf Apple	Malus 'September Ruby'	A large-sized apple good for eating and storage quality.
Prunus - Apricots		
Our apricots are grown on Mustang® rootstock, a very hardy cherry/plum cross that has minimal suckering.		
Casino Apricot	Prunus mandshurica x 'DurGarfield'	Very hardy & high quality fruit that is oval to slightly oblong and freestone. The yellow fruit ripens in August with a red tinge on the blush. It is semi-self-pollinating but will set a heavier crop if it is cross-pollinated with another apricot or Nanking Cherry.
Scout Apricot	Prunus mandshurica 'Scout'	Self-pollinating, but more productive with a pollinator. An early, disease-resistant, reliable bearer.
Westcot Apricot	Prunus mandshurica 'Westcot'	Fruit ripens in August. It is golden yellow with a reddish tinge. Good for fresh eating. Excellent for canning and jam.
Prunus - Plums		
Our plums are grown on Mustang® rootstock, a very hardy cherry/plum cross that has minimal suckering.		
Brook Gold Plum	Prunus salicina 'Brook Gold'	A high-quality gold plum with good size. The variety is vigorous and bears heavily. Excellent eating.
Brook Red Plum	Prunus salicina 'Brook Red'	The sister to the Brook Gold in quality and size of fruit. The variety produces a red fleshed, red skin plum with excellent eating characteristics.
Mount Royal Plum	Prunus 'Mount Royal'	A well known hardy, dark purple plum. Used in many of the colder areas of Canada.
Pembina Plum	Prunus 'Pembina'	A well known lovely plum used successfully for many years throughout the Prairies.
Tecumseh Plum	Prunus salicina x americana 'Tecumseh'	Medium deep purple blushed fruit of high quality with juicy red flesh. Good for eating fresh or in jams and jellies. Densely branched, upright tree bears consistently. This fruit ripens in September and requires pollination.
Prunus - Sour Cherries (Dwarf Tree Form)		
All our Dwarf Cherries are introductions from the University of Saskatchewan.		
Carmine Jewel Cherry	Prunus cerasus 'SK Carmine Jewel'	Very hardy cross between Mongolian and sour cherry.
Crimson Passion Cherry	Prunus cerasus 'Crimson'	Large, sweet fruit that is excellent for eating.

Common Name	Botanical Name	Description
Fruit Trees and Shrubs		
Prunus - Sour Cherries (Dwarf Tree Form)		
Cupid Cherry	Prunus cerasus 'Cupid'	Large fruit with good flavour; excellent for fresh eating or processing. Blooms one week later than other Saskatchewan cherries.
Juliet Cherry	Prunus cerasus 'Juliet'	Juliet has an excellent fresh eating cherry with high sugar content and is also great for processing. The plant produces few suckers and is self-pollinating.
Romeo Cherry	Prunus cerasus 'Romeo'	This flavourful fruit is good for fresh eating and processing. Self-pollinating.
Prunus - Sour Cherries (Tree Form)		
Evans Cherry	Prunus x 'Evans'	This variety is an open pollinating hardy seedling from the Edmonton area that has produced cherries of excellent quality. Semi-sweet fruit.
Pyrus - Pears		
Our pears are 2-year on bud, branched and grown on hardy Pyrus ussuriensis seedling rootstock.		
Early Gold® Pear	Pyrus ussuriensis 'Early Gold'	An introduction from Jeffries Nurseries in Manitoba. A seedling of Ure Pear, but has an earlier maturity.
Golden Spice Pear	Pyrus ussuriensis 'Golden Spice'	In spite of the fruit being small, this variety is very hardy, and has an excellent use for the ornamental value. The blooms are white, the colour of the new growth bark is a golden colour, the growth pyramidal, and the fall colour of the leaf is purple after the first frosts.
Navigator Pear	Pyrus x 'DurPSN 303'	An extremely hardy selection from Manitoba by Rick Durand. Excellent as an ornamental and performs better in higher PH soils.
Paul's Pear	Pyrus ussuriensis x 'Paul'	This is a selection from Paul Hamer at Saskatoon Farm in DeWinton, AB. It bears larger fruit and also has very upright columnar branching suitable for confined spaces. An excellent new introduction!
Ure Pear	Pyrus ussuriensis 'Ure'	A Morden Research Station selection of Ussuriensis seedling. Like Golden Spice, the fruit is small, but the variety is under used as an ornamental variety.

Product Catalogue

Thursday, September 28, 2017

Common Name	Botanical Name	Description
Ornamental and Shade Trees		
Acer - Maple		
Amur Maple	<i>Acer ginnala</i>	A choice small tree, among the hardiest of all maples; incredible fall colours ranging from orange to scarlet and burgundy red, neat habit and colourful seeds in late summer, one of the best accent trees for small home landscapes. Amur Maple is a deciduous tree with a strong central leader and a more or less rounded form. This tree does best in full sun to partial shade. It is very adaptable to both dry and moist locations, and should do just fine under average home landscape conditions.
Hot Wings Maple	<i>Acer tatarian</i> 'Hot Wings'	A spectacular new addition that is graceful, upright and spreading. This is a smaller accent tree that features blazing red hot seeds in late summer and fiery fall colours. The little yellow flowers are followed by bright red samaras, hence the name Hot Wings.
Manitoba Maple	<i>Acer negundo</i>	A high-headed tree forming a broad, rounded shape at maturity. Transplants easily and is a hardy shade tree in open areas, tolerating a wide range of soils. This vigorous grower has bright green leaves with a lighter green bottom.
Pattern Perfect Tatarian Maple	<i>Acer tataricum</i> 'Patdell'	This is a good small accent tree for the home landscape that develops a rounded crown, showy red seeds in summer and orange-red fall colour; more tolerant of drought and alkaline conditions than the otherwise similar Amur maple.
Sensation Manitoba Maple	<i>Acer negundo</i> 'Sensation'	A hardy selection of Manitoba Maple with a red tinge to the leaf, great red fall colour and more uniform growth than straight Manitoba Maple.
Silver Cloud Maple	<i>Acer saccharinum</i> 'Silver Cloud'	An upright uniform growing selection of Silver Maple from Manitoba developed by Rick Durand. This is the hardiest of the Silver Maple strains available and is also the best shaped of the various hardy selections. Grown from cuttings.
Tatarian Maple	<i>Acer tataricum</i>	The Tatarian Maple is similar to the Amur Maple. However, the Tatarian grows a little larger and tends to favour a tree form without as much intervention as the Amur Maple. A gorgeous tree with great fall colour.
Aesculus - Horse Chestnut		
Ohio Buckeye	<i>Aesculus glabra</i>	A very hardy smaller tree that is in the horse chestnut family. Very little pruning required. Beautiful as a feature tree.

Common Name	Botanical Name	Description
Ornamental and Shade Trees		
Alnus - Alder		
Prairie Horizon® Manchurian Alder	<i>Alnus hirsuta</i> 'Harbin'	One of the most drought tolerant alders available. This medium-sized tree has strong, upright growth. Dark green foliage and gray, beech-like bark. The leaves turn yellow in the fall. Purple catkins and brown, cone-like strobiles add interest during winter.
Betula - Birch		
Cut Leaf Weeping Birch	<i>Betula pendula laciniata</i>	With the graceful weeping branches, and the serrated small leaves, this variety is everyone's favourite birch. This variety needs plenty of room to grow. Very hardy. We grow ours on their own root.
Dakota Pinnacle Birch	<i>Betula platyphylla</i> 'Fargo'	Another exciting introduction from N. Dakota State University. This variety is very compact and upright and adapts very well to the poor growing conditions we see in the Prairies. Hardiness is excellent, and birch borer resistance seems good, though not entirely resistant.
Paper Birch	<i>Betula papyrifera</i>	The hardiest of the native Birch. The incidence of top kill is minimal, the trunk colour turns very white as the tree matures, and the life span is long.
Paper Birch Multi-Stem	<i>Betula papyrifera</i> 'multi'	These are a three-stem clump of Paper Birch. Very popular as a feature item.
Prairie Dream Paper Birch	<i>Betula papyrifera</i> 'Varen'	This North Dakota State University introduction is extremely hardy and resistant to bronze birch borer. This variety's bark is pure white, is semi-pyramidal in growth habit and is excellent as either a single stem or a multi-stem.
Royal Frost® Red-Leafed Birch	<i>Betula</i> x 'Royal Frost'	'Royal Frost' is noted for its beautiful burgundy-red to purple foliage and its exfoliating white bark with cinnamon hues. It is a cross between <i>Betula</i> x 'Crimson Frost' and <i>Betula poulifolia</i> 'Whitespire Sr.' cross and is a small to medium sized tree that typically grows 25-40' tall with an upright, narrow-pyramidal shape. Fall is a festive arrangement of colours ranging from bright red, orange, yellow and purple. Truly a spectacular all season tree.
Crataegus - Hawthorn		
Paul's Scarlet Hawthorn	<i>Crataegus laevigata</i> 'Paul's Scarlet'	A showy tree in bloom with its double scarlet flowers that lighten in colour with opening. Forms a dense upright, spreading oval tree. Foliage is glossy green. This variety is not prairie hardy.

Product Catalogue

Thursday, September 28, 2017

Common Name	Botanical Name	Description
Ornamental and Shade Trees		
Crataegus - Hawthorn		
Snowbird Hawthorn	Crataegus x mordenensis 'Snowbird'	An upright-growing hardy hawthorn whose flowers are double white.
Toba Hawthorn	Crataegus x mordenensis 'Toba'	An upright-growing hardy hawthorn whose flowers come out white and turn pink.
Elaeagnus - Russian Olive		
Russian Olive	Elaeagnus angustifolia	A native plant in many areas. The silver, gray leaves give excellent contrast in landscapes. Although hardy, this vigorous variety is susceptible to top kill from early extremely cold weather in the fall. Larger plants are usually slow to leaf out in the spring.
Fraxinus americana - White Ash		
Nobility White Ash	Fraxinus americana 'Jefwis'	An improved selection of white ash selected from a northern Wisconsin seed source by Dr. Philip Ronald. Nobility® possesses upright-branching, oval-shaped crown and clean foliage. Foliage turns a deep purple colour early in the fall.
Tuxedo White Ash	Fraxinus americana 'DurGar'	This selection is the most compact hardy of the white ash selections made by Rick Durand in Manitoba. Excellent purple fall leaf colour, and upright, compact growth habit.
Fraxinus manchurian & nigra - Manchurian and Black Ash		
Fall Gold Black Ash	Fraxinus nigra 'Fall Gold'	An excellent selection of seedless black ash with consistent growth habits. Extremely hardy, this variety has many uses as a shade tree. This tree has to be budded on green ash for suitable planting in the Prairies.
Mancana Ash	Fraxinus manchurian 'Mancana'	A seedless Manitoba selection of manchurian ash. The leaves are a lime green in colour, the wood of the new growth is a golden yellow and the tree stays smaller than most of the other ash strains used in the Prairies. Reported not to be totally hardy in all "Chinook Belt" areas. Ours is budded on green ash rootstock for better Prairie performance.
Northern Treasure Ash	Fraxinus x 'Northern Treasure'	The best manchurian/black ash cross, released from the Morden Research Station. A vigorous, large tree with some of the best characteristics of both Fall Gold and Mancan.

Common Name	Botanical Name	Description
Ornamental and Shade Trees		
Fraxinus pennsylvanica - Green Ash		
Foothills Green Ash	Fraxinus pennsylvanica 'Heuver'	A selection by Foothills Nursery in Calgary, Alberta. The foliage is shiny green, with smaller leaves than a Patmore and a broader growth characteristic.
Patmore Green Ash	Fraxinus pennsylvanica 'Patmore'	The parent tree was found in Vegreville, Alberta and has been the main stream of seedless green ash in the Prairies. The growth habit is uniform and upright, the leaves are extremely shiny, and the bark remains smooth with a gray tinge even as the tree matures. Very maintenance free.
Prairie Spire Green Ash	Fraxinus pennsylvanica 'Rugby'	A newer introduction from North Dakota of seedless green ash. It has a much tighter head and more compact growing habit than Patmore. Tests in the Calgary area shows hardiness as good as, or probably better, than Patmore.
Trojan Green Ash	Fraxinus pennsylvanica 'Durwinky'	A Rick Durand introduction from Winkler Manitoba. It is an extremely hardy seedless male tree with a very upright and compact growth habit. We believe it is the hardiest of the male seedless strains of green ash. It is an excellent choice for spaces that require limited horizontal spread.
Juglans - Walnut		
Butternut	Juglans cinerea	Growing to 20 m tall, rarely 30 m, and 40–80 cm stem diameter, with light gray bark. The leaves are somewhat brighter, and more yellow-green than many other tree leaves. Nuts are produced in bunches of 2-6 together; are oblong-ovoid and surrounded by a green husk before maturity in fall.
Maackia amurensis - Amur Maackia		
Summer Frost Amurensis	Maackia amurensis 'Summer Frost'	Exclusive to Advance Nursery. A selection by Garfield Marshall from northerly sourced Amur Maackia seedlings. Summer Frost is a hardy compact tree for tough sites but may not be totally hardy in "Chinook Belt" areas. Only reaching about 15' tall, it tolerates severe dryness, cold and heavy soils. The unfolding spring buds evolve into silvery and showy summer flowers with a frost-like appearance.

Common Name	Botanical Name	Description
Ornamental and Shade Trees		
Malus - Flowering Crabapples		
Our crabapples are 2-year on bud, branched and grown on hardy seedling rootstock.		
Big River Crabapple	Malus 'Big River'	Another very good upright-growing, green-red foliage crab. Blooms are pink. Excellent for close planted areas. Very hardy.
Columnar Baccatta Rosthern Crabapple	Malus baccata 'Columnaris'	An extremely pyramidal growing green-leafed variety. The leaves and the very small fruit both turn yellow in the fall. Very hardy with white blooms. This strain is not as susceptible to fire blight as straight Columnar Baccatta.
Courageous Flowering Crabapple	Malus x 'DurLawrence'	A newer Rick Durand selection that is well adapted to most sites that require a low maintenance tree. Strong flowering in early spring (lilac to pink) with an upright crown form gives it a neat appearance year round. New foliage is green-maroon turning yellow-orange in the fall. Courageous has a high resistance to both fire blight and apple scab.
Dolgo Crabapple	Malus 'Dolgo'	An extremely hardy green-leafed variety whose fruit is bright red and is used for canning. The variety has been one of the best known and used in the Prairies for years. Bloom is white with pink tinges. Growth is vigorous.
Gladiator® Flowering Crabapple	Malus x 'DurLeo'	A Rick Durand selection of an attractive hardy rosybloom crabapple. It has a stately appearance with its tidy upright crown form and dazzling glossy burgundy-purple leaves accompanied by a profusion of bright pink flowers in the spring followed by small reddish-purple ornamental fruit. Gladiator has a high resistance to both fire blight and apple scab.
Jade Bouquet Flowering Crabapple	Malus x 'Theonstar'	Jade Bouquet Columnar Flowering Crab bred by Theon Pheh, and selected and introduced by Sunstar Nurseries in Edmonton. It has pure jade green, glossy leaves, with a upright spiring branching habit. The profuse white blossoms cover the tree in the spring on its pillar-like form which develop into small orange-red fruit. The foliage shows good resistance to leaf diseases and is held fairly late in the fall, turning to a yellow-orange hue. Is an excellent tree for accent and screening purposes in small yards.
Kelsey Crabapple	Malus 'Kelsey'	The only double pink blooming crab that is hardy enough for most of the Prairies. This variety is a dwarf-grower, upright in habit and has small bronze/purple leaves.
Makamik Crabapple	Malus 'Makamik'	A wide headed, bronze leafed variety, which is very hardy. The heavy bright pink bloom lasts longer than many of the varieties.

Product Catalogue

Thursday, September 28, 2017

Common Name	Botanical Name	Description
Ornamental and Shade Trees		
Malus - Flowering Crabapples		
Pink Spires Crabapple	Malus 'Pink Spires'	A very hardy, narrow-growing, rosy bloom. Pink flowers, with purple-red foliage that turns almost green in the summer.
Radiant Crabapple	Malus 'Radiant'	An excellent, upright-growing, vigorous variety with bright pink blooms. The foliage is bronze/purple.
Rosy Glo Crabapple	Malus 'Rosy Glo'	An introduction from Bron and Sons Nursery, Grand Forks, B.C. A very hardy, purple-leaved weeper. Pink blooms, and slightly more vigorous than Royal Beauty.
Royal Beauty Crabapple	Malus 'Royal Beauty'	A weeping, purple leafed, pink blooming variety originating in Saskatchewan. This crab will definitely have a place for residential landscapes in areas needing hardier weeping crabs.
Royalty Crabapple	Malus 'Royalty'	The favourite, back yard variety of flowering crab. Shiny, purple leaves with a small red bloom and a slow growth habit make it an excellent accent tree for smaller spaces. Very hardy.
Rudolf Crabapple	Malus 'Rudolf'	Another excellent upright-growing, bronze leafed variety with red flowers. The growing tip leaves stay very red in colour through the growing season.
Selkirk Crabapple	Malus 'Selkirk'	The most vigorous variety of crab we grow. Large, crinkled purple/bronze leaves, a wide dense head and deep pink blooms make this an excellent variety.
Shaughnessy Cohen Flowering Crab	Malus 'Shaughnessy Cohen'	A beautiful tree with fuchsia pink flowers in spring and small reddish-purple fruit in fall, foliage retains a reddish hue all season; the definitive ornamental accent tree for the home landscape, needs well-drained soil and full sun.
Spring Snow Crabapple	Malus 'Spring Snow'	A sterile green-leaved crab very similar in leaf, bloom and growth habit to Dolgo.
Starlite Crabapple	Malus 'Jeflite'	Selected for its dark green, shiny foliage that shows outstanding resistance to apple scab. White flowers in early spring. The fruit is very small and shiny, and bright red in colour. The fruit is retained well into the winter months and adds to this cultivar's ornamental value. Upright branching habit.
Thunderchild Crabapple	Malus 'Thunderchild'	An upright-growing purple leafed variety that is the favourite commercially planted crab. Not as shiny a leaf as Royalty, but resistant to fire blight and very hardy.

Common Name	Botanical Name	Description
Ornamental and Shade Trees		
Populus - Poplars		
AC Sundancer Poplar	Populus x ACWS151	A new hardy upright male selection by AAFC - AESB Agroforestry Development Centre, Indian Head, SK from a cross between P. x 'Walker' and P. x Canadensis 'serotina de selys'. AC Sundancer has shown resistance to disease and insect pests such as poplar bud gall mite, cytospora, septoria canker and melampora leaf rust. It is cold hardy and drought tolerant. It is not likely to spread by root suckers and is widely adapted for planting in the Canadian Prairies. Its hardiness should be trialed in chinook conditions.
Assiniboine Poplar	Populus x 'Assiniboine'	An upright-growing hardy poplar. Resistance to canker appears very good.
Memorial Poplar	Populus 'City of Calgary'	A City of Calgary Parks Department selection. An upright-growing hardy poplar that is found on Memorial Drive in Calgary. Parentage is uncertain but it is thought to be Himalayan. Resistance to canker appears very good and is very cold hardy.
Narrowleaf Poplar	Populus angustifolia	A variety that has been around for many years and has shown much less susceptibility to canker than other varieties. Upright, vigorous growth. Very popular in high altitude climates.
Northwest Poplar	Populus 'Northwest'	Still popular because of its round head and ease of growth. Very hardy.
Okanese Poplar	Populus 'Okanese'	A new semi-upright male poplar released in 2007 by AAFC-AESB Agroforestry Development Centre, Indian Head, SK. Its large leaves, and disease and drought resistance make this poplar an excellent windbreak variety.
Prairie Sky Poplar	Populus canadensis 'Prairie Sky'	A columnar form with deep green foliage that was developed by the Morden Research Station in Manitoba. Yellow fall colour. Suggested for use in shelter belts and hedges. Excellent cold hardiness, disease resistant and seedless.
Sargenti Poplar	Populus 'Sargenti'	This is a seedless plains cottonwood which grows in a beautiful upright form. Slow to leaf out in the spring, this variety keeps its leaves green very late into the fall.
Tower Poplar	Populus x canescens 'Tower'	A Morden Research Station introduction. An extremely pyramidal growing variety suitable for screening or windbreaks. The leaves resemble Aspen leaves because of the parentage and are grey/green in colour. Larger sized bare root trees have to be sweated or they will have difficulty in leafing out.

Common Name	Botanical Name	Description
Ornamental and Shade Trees		
Populus - Poplars		
Tristis Poplar	Populus 'Tristis'	A vigorous, large-headed, hardy poplar that is regaining in usage in the Prairies. Canker resistance is better than many other varieties.
Populus tremuloides & tremula - Aspen		
Advance Upright Aspen	Populus tremuloides 'Advance'	We made this selection more than 15 years ago from trembling aspen seedlings. Its branching is very upright, much like a Tower Poplar, with a very white trunk colour. Growth is vigorous and requires no pruning. Very transplantable and not susceptible to shoot-tip blight. This must be spring dug.
Swedish Columnar Aspen	Populus tremula 'Erecta'	Extremely pyramidal form of Aspen much like the habit of Tower Poplar. The new growth has reddish coloured leaves. Very hardy. Larger sized bare root trees have to be sweated or they will have difficulty in leafing out.
Trembling Aspen	Populus tremuloides	A large native variety noted for its hardiness, vigorous growth habit, white bark and leaves, which flutter at any amount of air movement. Susceptible to shoot-tip blight, but excellent in native planting.
Trembling Aspen Multi-Stem	Populus tremuloides 'multi'	These are a three or four stem clump of Trembling Aspen for use in a lot of native plantings.
Prunus - Mayday Chokecherry		
Advance Mayday	Prunus padus 'Advance'	We selected this seedling in 1984 from a lot of seedlings originating from mature trees in Calgary and picked by Hans Bron of Bron & Sons Nursery. The parent tree stays extremely columnar in growth, blooms about one week ahead of regular Maydays and on the mature tree, has a deep gray bark colour. This selection has proven, over the years, to be the hardiest of the Mayday selections available. We grow this selection from cuttings only.
Mayday	Prunus padus commutata	A vigorous large headed chokecherry like variety noted for its fragrant white blooms in the spring. Winter damage is possible in severe Chinook conditions.
Sunstar Mayday	Prunus padus 'Sunstar'	A selection of Mayday by Harold Voogd of Sunstar Nurseries in Edmonton. This selection is more upright than standard Mayday, has excellent bark colour, and prolific blooms that appear later than standard Mayday.

Product Catalogue

Thursday, September 28, 2017

Common Name	Botanical Name	Description
Ornamental and Shade Trees		
Prunus - Mayday Chokecherry		
Sweetheart Mayday	Prunus padus 'Sweetheart'	This hardy Mayday is our selection of red-leaf and very pink bloom Mayday from a seed source of Lakeshore Tree Farms in Saskatoon, Saskatchewan. The growth is upright, leaf colour is red/purple, and the bloom very pink. We grow it from cuttings. Excellent in both commercial and residential plantings, as it is a smaller less vigorous selection. It does not sucker and appears very hardy.
Prunus - Amur Cherry		
Amur Cherry	Prunus maackii	A vigorous growing member of the Prunus family noted for its yellow/golden coloured bark which "peels" much like a Birch tree. A chokecherry type of white cluster bloom in the spring gives additional colour. The variety suffers from sunscald, trunk splitting and top kill in severe Chinook conditions. Low branching of the head seems to help in these conditions.
Amur Cherry Multi-Stem		These are a three or four stem clump of Amur Chokecherry.
Goldspur® Amur Cherry	Prunus maackii 'Jefspur'	This selection of columnar slow growing Amur Cherry was introduced by Jeffries Nurseries in Manitoba. The leaves are very deep green, and the trees appear to need less growing space than the other Amur Cherries, making them excellent for smaller spaces.
Klondike Amur Cherry	Prunus maackii 'Klondike'	This is a new selection introduced from Jeffries Nurseries in Portage La Prairie, Manitoba. It was selected for its stronger branching pattern, stem strength and lower susceptibility to frost cracking. It has excellent bark colour similar to open pollinated Amur Chokecherry.
Ming Cherry	Prunus maackii 'Ming'	This is a cross between a Pin Cherry and Amur Cherry. Dark bark in Amur Cherries has been associated with tolerance to frost cracking, and this is the darkest bark we have ever seen. It is a most beautiful, striking burgundy colour. The 'Ming' branches consistent so that a very full head develops quickly. The branching is also nicely upright. Beautiful tree.
Prunus - Ornamental Plums		
Muckle Plum	Prunus x nigrella 'Muckle'	A small to medium sized ornamental tree with burly pink/red blooms and red/bronze foliage. Excellent for yard plantings.

Common Name	Botanical Name	Description
Ornamental and Shade Trees		
Prunus - Ornamental Plums		
Princess Kay Plum	Prunus nigra 'Princess Kay'	This is a double flowering hardy ornamental plum from Northern Minnesota. Blooms are white, and prolific. Tree size is moderate, quite upright and very hardy.
Prunus - Pin Cherry		
Pin Cherry	Prunus pennsylvanica	This seedling is gaining popularity for its good "cherry-like" bark, and hardiness. A small tree; it has small white blooms and has a wide head. Suckering can be an issue.
Prunus - Schubert Chokecherry		
Arrowhead Dwarf Schubert	Prunus virginiana 'Arrowhead Schubert'	This is a dwarfing clone of Schubert Chokecherry with intensely dark purple leaves. It grows at about one third to half the rate of Bailey's Select and is less susceptible to black knot. An excellent small yard tree.
Baileys Select Schubert	Prunus virginiana 'Baileys Schubert Select'	We grow this selection of Schubert because of its uniformity of growth and because it is prone to less suckering. Green new growth leaves turn dark purple after several weeks so the variety has the two colours of leaf during the growing season. Extremely hardy and useful in many conditions. Ours are grown from cuttings.
Midnight Schubert	Prunus virginiana 'Midnight'	This is an introduction from Lakeshore Tree Farms in Saskatoon, SK. The leaves are larger and the head broader than the Bailey's Select strain. Grown from cuttings, and free from most suckers.
Schubert Chokecherry	Prunus virginiana 'Schubert'	In response to requests from several of our clients, we have grown a "clump" variation of Schubert Chokecherry.
Quercus - Oak		
Burr Oak	Quercus macrocarpa	This slow growing hardy native oak of many parts of the Prairies is the hardest of the Oaks, but unique in the corky bark texture and leaf shape. Slow to leaf out and transplant.
Northern Pin Oak	Quercus ellipsoidalis	Northern Pin Oak is a medium sized tree that tolerates dry, salty soils. Good fall colour, acorns that are prized by wildlife and survival under poor conditions make this tree a strong option for the urban landscape. It does well on poor soils and is the most drought tolerant of black oaks.

Common Name	Botanical Name	Description
Ornamental and Shade Trees		
Quercus - Oak		
Sentry Oak	Quercus macrocarpa 'Sentry'	A new Advance Nursery introduction. A selection by Garfield Marshall from Burr Oak seedlings from Saskatchewan. Selected for its very upright and tight branching pattern and vigorous growth rate. Its form and growth rate have been tested over several generations where they have remained consistently true to the original selection. The original selected seedling is now over 20 years old, 60' tall and only 12' wide. The best upright Burr Oak selection available!
Salix - Willow		
Advance Golden Willow	Salix aurea 'Advance'	An upright growing variety with golden bark. This is a hardy selection, which originates from High River, Alberta.
Prairie Reflection™ Laurel Leaf Willow	Salix pentandra 'Silver Lake'	This selection was developed by North Dakota State University as a superior tree to standard Laurel Leaf selections. The tree has a higher survival rate, and seems to tolerate higher pH soils with the iron deficiencies that accompany this condition. Growth habit and size is the same as regular Laurel Leaf strains.
Sorbus - Mountain Ash		
American Mountain Ash	Sorbus americana	A slower growing variety of Mountain Ash with darker green leaves and a redder berry than the European Mountain Ash.
Blackhawk Mountain Ash	Sorbus aucuparia 'Blackhawk'	A selection of hardy European Mountain Ash that has more resistance to sunscald than many others.
Decora Mountain Ash	Sorbus decora 'Grootendorst'	A stocky and broad headed dwarf selection that originates from Europe. Commonly known as Showy Mountain Ash. It is the hardiest mountain ash available and is useful for confined spaces and not susceptible to fireblight.
Luxor Pyramidal Mountain Ash	Sorbus aucuparia 'Luxor'	A new Advance Nursery introduction. Selected from a European Mountain Ash seedling for its very full and columnar branching pattern. It has very dark green foliage and produces bright orange berries in the fall.
Oak Leaf Mountain Ash	Sorbus hybrida	This variety is a cross between European Mountain Ash and Swedish Mountain Ash. The leaf is shaped like an Oak Leaf, and light green in colour. The fruit is orange in colour. The tree is a compact, oval shaped head with very controlled growth. Fire blight resistant.

Common Name	Botanical Name	Description
Ornamental and Shade Trees		
Sorbus - Mountain Ash		
Red Cascade™ Mountain Ash	Sorbus americana 'Dwarfcrowne'	A very nicely shaped, compact tree which is excellent for small spaces. Spring flowers, lustrous summer foliage, yellow fall colour and handsome winter form make it a year-round attraction.
Russian Mountain Ash	Sorbus aucuparia 'Rossica'	An upright-growing strain of European Mountain Ash which is much less susceptible to fire blight. Hardiness is excellent, but as with all mountain ash strains, tolerance to "wet feet" is poor especially in cold heavy clay soils.
Showy Mountain Ash	Sorbus decora	Native to North America and grown from seed, it is an extremely adaptable open tree with a narrower and higher branching than its European counterpart.
Syringa - Lilac		
Ivory Silk Japanese Tree Lilac	Syringa reticulata 'Ivory Silk'	The standard in tree lilacs. Creamy white blooms, and a cherry-like bark make this a beautiful smaller tree in both residential and commercial plantings.
Signature™ Japanese Tree Lilac	Syringa reticulata 'Sigzam' Signature™	This new tree-form lilac introduction blooms 1 – 2 weeks later than Ivory Silk, extending the lilac season. Its white flowers are formed in round panicles rather than the conical form of Ivory Silk's flowers. This variety has more upright columnar branches than Ivory Silk and its foliage has a bronze fall color. Highly recommended new introduction.
Tilia - Linden		
Dropmore Linden	Tilia flavescens 'Dropmore'	Dropmore is the standard that lindens are judged by in the Prairies. Excellent hardiness and form make this a tree that will take up some of the uses of the ash varieties. Easy to transplant when adequate moisture is available.
Harvest Gold® Linden	Tilia mongolica 'Harvest Gold'	This Jeffries Nurseries introduction looks very promising because of excellent upright growth habit, hardiness, and fall leaf colour. Not as hardy as Dropmore or American Linden selections.
True North American Linden	Tilia americana 'DurRos'	This Rick Durand selection is a very upright and hardy selection of native Big Leaf American Linden with dark green leaves and distinctive white bark. It is an excellent choice for spaces that require limited horizontal spread.

Common Name	Botanical Name	Description
Ornamental and Shade Trees		
Ulmus - Elm		
American Elm	Ulmus americana	A rapid growing, vase shaped tree, which excels as a boulevard variety. Although susceptible to Dutch Elm Disease, its beauty and usefulness makes this variety very popular.
Brandon Elm	Ulmus americana 'Brandon'	A selection of american elm made for its uniformity of rapid growth. Very hardy and beautifully vase shaped. Ours are grown from cuttings, not grafts.
Patmore American Elm	Ulmus americana 'Patmore'	Exclusive to Advance Nursery. An upright selection of American Elm that has a more regular and stronger branch pattern than Brandon that allows it to be more easily grown with a dominant leader.
